THE STRAWBERRY WATER.

The first incorporation under the irrigation law of 1905 was filed with the Secretary of State yesterday. The articles were those of the Strawberry Valley Water Users' association, formed to carry out the big tunnel project in Utah county which is being fostered by the United States Government.

The powers granted to the corporation are generally those of an irrigation company, for the use and benefit of the shareholders. The company also has the power to engage in the generation, use and sale of electrical power and energy and also to enter into agreements with the United States Government under the reclamation act of June 17, 1902.

The headquarters of the association are to be at Spanish Fork, Utah county, and the lands proposed to be irrigated are those in Utah county included in the Government's Strawberry valley reclamation project. The capital stock is placed at \$2,000,000, in shares of the par value of \$40.

The first board of directors named in the articles of incorporation are the following: William T. "Make Hay While the Sun Shines."

There is a lesson in the work of the thrifty farmer. He knows that the bright sunshine may last but a day and he prepares for the showers which are so liable to follow. So it should be with every household. Dysentery, diarrhoea and cholera morbus may attack some member of the home without warning. Chamberlain's Colic, Cholera and Diarrhoea Remedy, which is the best known medicine for these diseases, should always be kept at hand, as immediate treatment is necessary, and delay may prove fatal.
